

Paul Wurth InCub - where your ideas can grow

In cooperation with Technoport®, Paul Wurth S.A. has launched an incubation programme for young innovative and technology-driven companies searching for support in the development and implementation of their entrepreneurial projects. These start-ups can not only benefit from physical space and infrastructure on the premises of Paul Wurth in Luxembourg-Hollerich, but also from their proximity to an experienced player with a long-standing tradition of innovation in order to receive technological support or market feedback.

Projects likely to join Paul Wurth InCub will preferentially be related to fields such as

- Environmental technologies in the metals industry
- Energy-related technologies and business models
- Industry 4.0
- Advanced logistics and transportation concepts
- Smart and healthy buildings.

For any information about the selection process, please contact:
